

1. To get the new VPN client please open a web browser and go to <https://184.10.42.26> and login with your provided username and password.

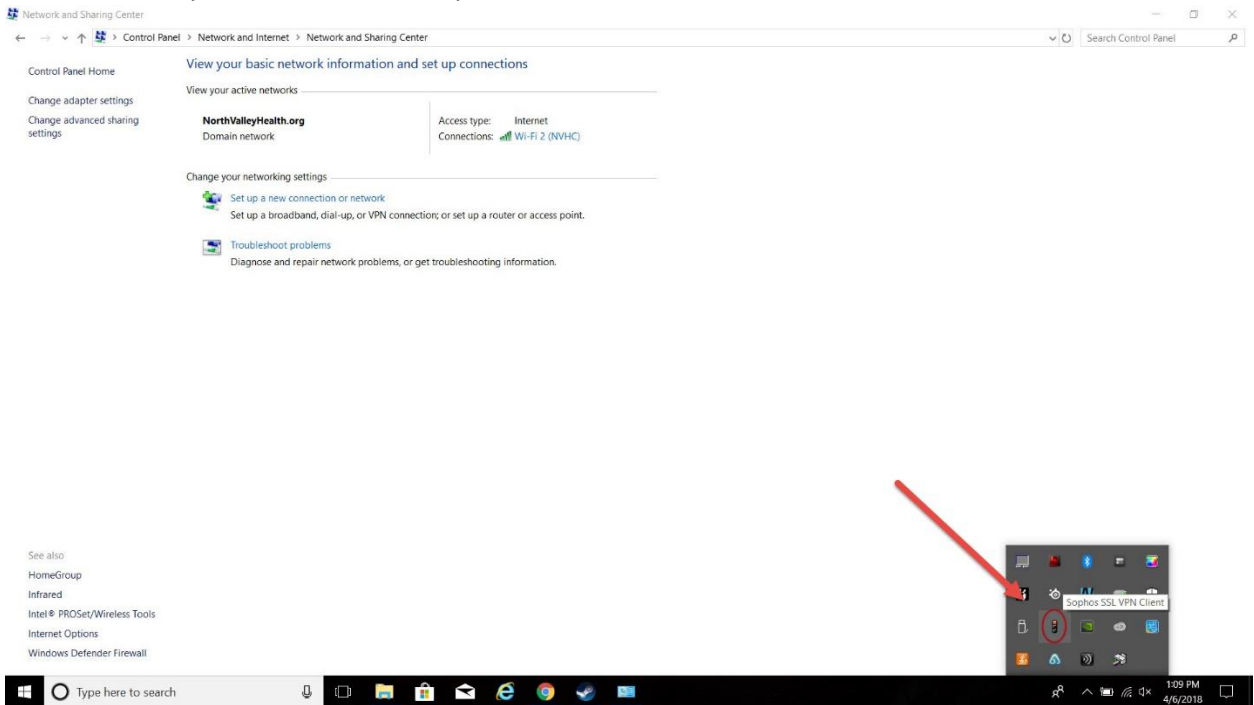

2. You will see the Remote Access in the menu bar toward the top of the page, please click that link.

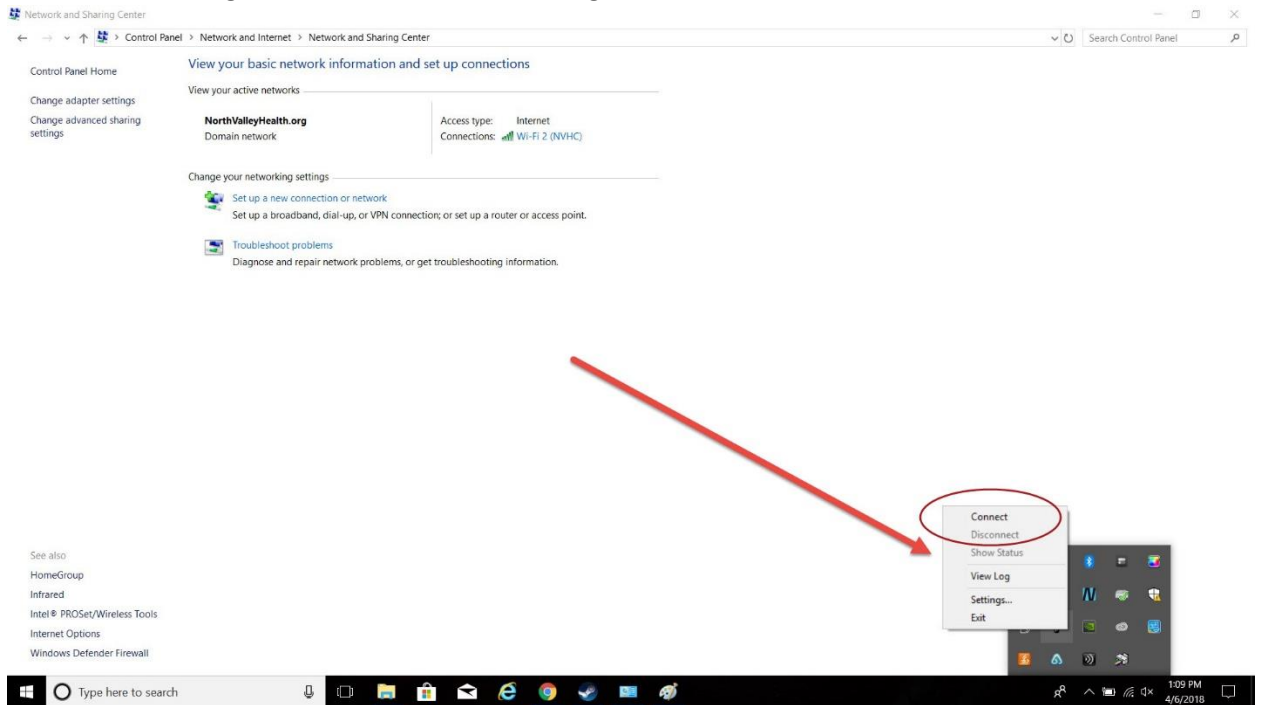

3. You will see several options on this page. Select the top option to download the full client for Windows7/8/10. Save the download and run when download finishes. You will need administrator access to install this software.

4. After the installation completes you will see a little traffic light in the toolbar in the lower right hand corner of your screen near the system time as shown here.

5. This shows a red light when it's disconnected. Right click on it and select connect.

6. You will then get a pop up asking for your username and password. Enter the credentials that were provide to you and click connect. When you do that the login window will disappear and you will see the traffic light turn yellow and finally green when it is connected. You can transfer images when the light is green.
